

## About SIMS

“We Educate Wealth Creators”

SIMS is not merely an entrepreneurial venture in the field of education. It is the result of a long drawn thought process involving industrialists, educationists, representatives of young generation and social workers to give a new direction to the whole learning process to meet the futuristic needs despite cultural and infrastructure constraints of the region which can make its own mark on the globe. While basic Mission and Vision Statements have been drawn keeping the future global scenario in mind, the whole learning environment is going to be based very much on Unique Indian Values System of „Vasudhaiv Kutumbakam”. It is a professionally managed institution with its independent identity.

## About SOE

School of engineering is a leading institute set up by Sanghvi institute of management and science in 2007 with a focus to provide engineering education. It offers B.E Programs in Information Technology, Electronics & Tele Communication, Civil, Computer Science and Mechanical Engineering disciplines. Along with the P.G M.Tech Programs with Specialization in Electronics Computer Science, Embedded System & VLSI Design. It also offers M.Sc. Bio Technology.
